PERSONAL PROJECTS

Wireframe prototype Mock screen design application

- Using Figma
- I have created a wireframe prototype that streamlines the process of booking a doctor's appointment through an application. With this cutting-edge design, you can book your medical appointments with ease and efficiency. By taking control of your health and booking an appointment with confidence, knowing that this user-friendly interface will make the process as smooth as possible.
- This project has been an exceptional opportunity for me to enhance my design thinking skills and gain invaluable experience.

Latest News Update Web-application

- Using ReactJs.
- Developed a dynamic news application using ReactJS, integrating RESTful APIs to fetch and display the latest news articles. Implemented features such as category filters, search functionality, and pagination. Focused on creating a responsive and user-friendly interface with efficient state management using React hooks and context API. Ensured optimal performance and cross-browser compatibility.
- This project has been a great opportunity for me to acquire extensive knowledge in react technology and user experience design.
